

Online Assessment System (CRCT Online) Information

Dear Parents,

The state CRCT test will be administered to grades 1-5 in April. The state Department of Education has created a website to allow students to practice taking the test. Your child's teacher has created and assigned practice tests to all of their students. Your child can access these CRCT practice tests from the Online Assessment System website. There is a link to this web site on the Patrick Elementary School web page - <http://www.patrickelementary.org/home1.htm>. The Online Assessment System site is best accessed using Internet Explorer. Your child's login will be their Georgia Test ID number and their password will be 6 a's - aaaaaa. Your child received a sticker from their teacher with this ID number on it to help in accessing the site. Before clicking the Login button on the site, hold down the Ctrl key on the keyboard and then click the Login button on the site. The site requires the pop up blockers to be disabled and doing this temporarily disables them for the site. Sometimes this doesn't work on the first try and you get an Invalid login message. You have to log in again and hold down the Ctrl key and click Login. Once you get logged in, you will see a message box appear asking if you want to continue to a secure site. Click Yes and then OK. Once your child has logged in, click on the Teacher assigned tests to begin taking a test. If your child forgets their number to log in to the site, they can also log in using a default logon and password. This will be the grade they are in, ex. Grade1 as the log on and password. You will need to follow the steps above holding down the Ctrl key.
